

Nobles Soil and Water Conservation District

No-Till Drill Rental

The Nobles SWCD currently has two No-Till drill options that are available for rental. Both rental options include a \$75.00 minimum charge or \$7.00 per acre, whichever is larger. The Dew Drop Drill also requires a \$200.00 refundable deposit for damages. Please contact the Nobles SWCD regarding any questions you may have regarding the no-till drill rental.

Dew Drop Drill

The Dew Drop Drill is a smaller drill for use with ATV's and smaller equipment. This drill has a 3' seeding width and is useful for narrow, rougher and harder to get to places. This drill is highly useful for food plots and can even seed corn for wildlife use.

Great Plains 706NT No-Till Drill.

The Great Plains Drill has a 7.5 Foot Seeding width with a 7.5 inch row spacing. This Drill requires a tractor with hydraulics for use. The drill can seed a variety of seeds including native grassed, waterway and pasture mixes, Oats, Wheat, and Soybeans.

***** The Nobles SWCD will pre-set the drills to recommended manufactures specifications for the seed and rate you choose. However it is up to the landowner to make adjustments in the field as needed. Small variations in seed, humidity, landscape and speed can increase or decrease seed placement. Drills WILL need adjustment in the field*****
